

## How to assemble nickel "screw top" cap

STEP 1: This vial comes in two pieces. Glue the cap to the glass vial using any type of glue that works on glass and metal. Craft glue or super glue works well.

STEP 2: Wipe any excess glue off the glass and around the cap and wait until the glue completely dries before the next step.

STEP 3: Take a pin or tack and insert it into the hole at the top of the cap and twist off the "screw top" bail.

STEP 4: This will be how you fill your vial and seal it once it is filled.

STEP 5: Once you fill the vial you can seal it by placing the "screw top" bail back into the vial. If you want a permanent seal add a drop off glue to the threading part of the bail and screw back on.
